

## 2015 Chevrolet Spark BEV Accelerated Testing - June 2015

Four model year 2015 Chevrolet Spark battery electric vehicles (BEVs) entered Accelerated Testing during January 2015 in a fleet in Arizona. Each Spark will be operated for 60,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby [www](#) pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2015 Chevrolet Spark BEVs have been driven a total of 13,235 miles. The cumulative average electricity consumption is 290.7 AC Wh/mile. Monthly electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
